3.Accuracy		
3.1	Overall Accuracy	<p>There are no specific quantitative evaluations related to the overall accuracy.</p> <p>The information is mainly based on the sample survey of legal persons and individual entrepreneurs.</p> <p>The obligatory provision of statistical reports by them is fixed in the legal acts regulating the statistics sector. The response rate is around 98%.</p>
3.2	Sources of Inaccuracy	Exhaustive survey of all enterprises is conducted based on the statistical business register data.

		In case of no submission of statistical data on defined date the data of the previous period are repeated.
3.3	Measures on accuracy	-
4.Comparability		
4.1	Comparability over Time	Before 1998 the data (indicators) were provided in accordance with the All Union Classification of Branches of Economy (AUCOBONE). During the years 1998-200 the 3rd revision of the International Classifications of Branches of economy (ISIC) was in use (UN). Since 2002 the data are provided in accordance with the Republic of Armenia classifications of main activity (worked out by the Armstat based on NACE international classifications of branches of economy). Since 2010 the second revision is used.
4.2	Comparability with other Statistics	There is comparability with other sources, for example the survey of economic activities of enterprises.
4.3	Coherence between Provisional and Final Statistics	Data published for the first time are called preliminary data. In case of changes the data are followed by explanatory notes. The preliminary data are reviewed based on the clarifications and corrections introduced by the economic subjects or other checks. The final data are provided in annual publications.
