

1. Foreword

The statistics is like to watch- it needs to be wound up for use.

Hakob Paronyan

***I escaped from the school since I have been taught in algebra,
not knowing that this subject will be interesting for me.***

Bernard Show

At the turn from XX to XXI century, under the conditions of entire globalization and speeding of markets internationalization, the information was become the most expensive product that is indispensable for providing the exceeding development rates for the statistical system producing the most valuable information.

The statistical information (data) should be reliable. The accounting and norms established by laws regulating financial reports and other legislative acts serve the basis for filling in the statistical documents (calculation of statistical indicators). In cases foreseen by the laws and other legislative acts the providers of statistical information implement special calculations and corrections, present statistical data (information) according to the established requirements.

The data considered confidential without the agreement of their provider should not be published or by other form disseminated. The agreement should be expressed in written form. In case of legal units the agreement should be done by their executive body or other body having appropriate authorization according to the regulations. Agreement can contain the restrictions concerning the use of data. The provision on non-publication or non-dissemination by other form of the information doesn't operate in case, when it is the information reflecting natural or other monopoly activity. Non-publication (non-dissemination) of this information will essentially influence on keeping of principles of the statistical information completeness. In such cases the decision on publication (dissemination) is adopted by the Council.

Article14, RA Law on "State Statistics"
