- the selection of representatives product (service) for price observation is done taking into account the level of their saturation and consumption in the consumer market, actuality, representativeness and etc. specifying their technical characteristics, measurement unit and other necessary features,
- the calculation of the summary consumer index is implemented based on price information database by marzes and the republic according to the "Classification Of Individual Consumption by Purpose" (COICOP) 12 sections (2 digit classification), 44 groups (3 digits classification), 94 classes (4 digits classification) and 188 subclasses (5 digits classification),
