5. SOCIO-DEMOGRAPHIC INDICATORS

5.7. Notarial Activity

According to the summary information of RA Ministry of Justice, for 2003, 301763 cases were ratified in the system, levied government duty comprised 559.7 mln. drams. Levied government duty per certified transactions comprised 1.9 ths. drams

5. SOCIO-DEMOGRAPHIC INDICATORS

Main Indicators on Notarial Activity

	Number of ratified cases, total	Levied government duty, ths. drams
Ratification of agreements on real estate alienation	30902	127073.8
including		
Residential buildings or dwellings (with and without plots)	20547	99956.5
Only plots	6078	6741.1
Other	4277	20376.2
Ratification of agreements on real estate lease	10640	15906.6
including		
dwellings	812	1731.0
only plots	7754	5238.5
other	2074	8937.1
Ratification of agreements on gratuitous use of real estate	920	3248.5
including		
only plots	220	561.5
other	700	2687.0
Ratification of agreements on servitude	3	1.5
Ratification of other agreements on real estate, except mortgage	957	3018.0
Ratification of agreements on mortgage	11344	43472.0
including		
mortgage of real estate or hypothec of movables	9871	37662.5
other	1473	5809.5
Ratification of agreements on movables	21485	105912.4
including		
alienation of road transport means	19432	96585.9
other	2053	9326.5
Ratification of other agreements	5442	10331.0
Certification of wills	4195	8590.0
Certification of warrants	39931	153145.7
including		
on right of ownership, use and disposal of real estate	5481	16027.0
on right of ownership, use and disposal of road transport means	16988	126694.5
other	17462	10424.2
Ratification of other transactions	1307	2830.0
Provision of certificates on inheritance	16054	11001.5
Provision of certificates on right of ownership for due property dividend from total estate	1330	1644.0
Certification of copies of documents or their extracts	46709	17703.5
Certification of signatures on documents	48923	24574.2
Certification of translation of documents	61541	31006.2
Confirmation of the fact that citizen is living	24	48.0
Confirmation of the fact that citizen is in certain place	3	6.0
Identification of person and citizen in the photo	7	14.0
Receiving, keeping, lodgement or reimbursement of money and securities on deposit	15	30.0
Presenting of evidences	1	2.0
Certification of minute of organization's general meeting or collegium conference	30	103.5
Total	301763	559662.4

5. SOCIO-DEMOGRAPHIC INDICATORS

5.8. Standardization, Metrology, Certification

According to the summary information of the RA Ministry of Trade and Economic Development for January-December 2003 the activity implemented in the fields of standardization, certification, accreditation and state monitoring on the observation of mandatory requirements for normative documents was characterized by the following indicators:

1. 165 standards were adopted and officially registered in Armenia. 143 interstate, 9 international and 13 RA standards were introduced in the territory of RA. 340 RA technical requirements on production were officially registered. 9 items of information materials were issued: catalogue of the standards, reference books, informational booklets.

5384 certificates of conformance were given, including 4359 ones - for imported products, 559 - for exported products, the other 466 were given for serial produce production in RA. 19 applications for certification of production were rejected for inadequacy of production.

2. 6 laboratory were accredited in the territory of RA.

Main Indicators on Standardization, Metrology, Certification Activity

	January-December 2003			
	Total	Increase or decrease in comparison with January-December, 2000 (decrease signed -), %	Increase or decrease in comparison with January-December, 2001 (decrease signed -), %	Increase or decrease in comparison with January-December, 2002 (decrease signed -), %
Number of adopted and officially registered standards	165	- 14.5	- 20.3	54.2
Number of officially registered technical requirements	340	- 26.1	- 4.0	9.3
Number of issued informational materials	9	- 52.6	- 50.0	- 18.2
Number of given certificates of conformance including	5384	- 30.4	- 0.6	3.4
for imported products	4359	- 35.7	7.3	6.7
for exported products	559	- 0.4	7.9	64.9
Number of rejected applications for certification of production	19	- 72.9	- 53.7	- 36.7

For January-December 2003 some types of imported products weren't certified due to low-quality.

List of the Products Not Certified Due to Low-quality in January-December 2003

Country, produced enterprise	Name of product	Model, type of product	Quantity
«Alexseev Concentrated Milk Factory», Russian Federation	Condensed milk in metal tin	-	180 kg
M. T. «Becton Dickinson»	Disposable syringes	-	1 kg
Austria «Semerit» Italy «Michelin»	Pneumatic tyres for passenger vehicles	-	8 units
«GAMMA» CJSC, Republic of Armenia	Jams: apricot, fig, blackberry	«Arega» 1/ 524g	-
-	Tyres for passenger vehicles	-	110 units

5. SOCIO-DEMOGRAPHIC INDICATORS

5.9. Activity of Archives

Activity of the RA State Archive. According to the summary information of the Archive Agency of the RA Ministry of Culture and Youth Affairs the indicators on insuring safety of Armenian National Archive Fund (ANAF), creation and development of scientific and informative system, completing and examination of importance of the documents, its using and publication in 2003 are presented in the tables below:

Insuring of Safety of the ANAF Documents

Insuring of physical safety of documents		
Restoration, paper	Binding and filing, file (unit of keeping)	Box preparation, file (unit of keeping)
165350	25575	51185

Creation and Development of Scientific and Informative System for ANAF Documents

Kind of documents	Regulation of documents		Improvement and processing of inventory, file (unit of keeping)	Cataloguing of documents, card	Preparation of reference books, unit
	paper	file			
Management documents	56631	23918	15139	21579	1
Personal documents	-	1278			

Completing and Examination of Importance of the ANAF Documents

Control on Organization Departmental Keeping of the ANAF Documents

Kind of documents	Acceptance of documents		Examination of importance of the documents, file (unit of keeping)				
	From organizations, enterprises and establishments (unit of keeping)	From citizens, paper	Keeping in state archive		Regulation of documents in departmental archives		Adoption of the inventory of files by Methodological and Experts Commission (MEC) (file)
			viewed	selected for destruction	permanent keeping	on staff	
Management documents	42393	-	48692	14976	13224	6286	25365
Personal documents	-	175340	-	-	-	-	-
Scientific-technical documents	1144	-	-	-	-	-	-
Photo-documents	-	75	-	-	-	-	-

Using and Publishing of ANAF Documents

Preparation of articles, selection of documents, handbooks	Preparation of radio and TV programmes	Organization of exhibitions of documents	Number of applications and inquires			Organization of work with researchers	
			Total	including		Number of researchers	Number of files provided for use
				subject	social and legal		
7	20	15	6719	130	6589	377	12850

Departmental Keeping of the Documents of Armenian National Archive Fund (ANAF). According to the summary information of the Archive Agency of the RA Ministry of Culture and Youth Affairs, as of 1 January, 2004 number of the institutions, who place the documents in the state archives, comprised 1598, 18.0% of which were non-state institutions. 30.4 % of the state institutions and 5.9 % of the non-state institutions have a nomenclature of files agreed with archival institutions, which are related to the management documents. 93.2% of documents of the state institutions are management, 6.8% - scientific and technical and those of the non-state institutions - 94.4% and 5.6% correspondingly.

5. SOCIO-DEMOGRAPHIC INDICATORS

Archive Activity of the State and Non-State Institutions

Kind of documents completing archives		Number of registered archives, total, unit	Including has		Files for permanent keeping, file (unit of keeping)				Files on personnel	
			Archive storage, sq. m.	Personnel, persons	total	Adopted by MEC of state archive	Marginal dates	Number of files kept longer than the period determined for keeping in departmental archive	total	Agreed with MEC of state archive
Management	state	1222	5275	173	273489	87950	1966-1998	28280	986486	354824
	non-state	271	1585	13	10589	-	-	-	12456	6012
Scientific-technical	state	89	3238	57	209400	12742	1956-1998	42900	-	-
	non-state	16	-	-	-	-	-	-	-	-

5.10. Characteristic of Hydro-Meteorological Conditions of RA Region for December 2003

According to the information of the RA Ministry of Nature Protection, in December 2003 the average monthly temperature of air was within the normal. High temperature was recorded in the first decade of December, when average daily temperature was above the norm by 2-5 degrees, in eastern regions – by 9-14 degrees.

The highest temperature of the month was recorded on 18 December in Syunik plain and Tavush +18 +20⁰C, in Ararat valley - +13 +17⁰C, in Lori, Syunik foothills - +12 +14⁰C, mountain regions - +4 +10⁰C (average daily temperature was above the norm by 4-9 degrees).

The low temperatures were recorded on 11-13, 21-23 and 29-31 days of the month (average daily temperature was below the norm by 5-10 degrees).

The lowest temperature was recorded at the night of 31 December. The minimal temperature in mountain regions and Lori was -13 -17⁰C (in Ashotsk -25⁰C), in Ararat valley -9 -12⁰C, in Syunik plains -5 +1⁰C.

The number of precipitation during the month in Shirak, Lori, Ijevan, Aparan and Sisian was within the norm. In the other regions it was strictly below the norm and comprised 22-60%. Precipitations were on 1-5, 9-10, 15-16, 18-20 and 26-27 days of the month.

Snow depth as of the 31st of December in Ashotsk comprised 40 centimetres, in Amasia - 31 centimetres, in Jermuk - 32 centimetres, in the mountain regions of Kotayk and Aragatsotn - 20-24 centimetres, in Ararat valley - 6-8 centimetres, in Syunik and Tavush there wasn't any snow depth.

On some days of December there was an intensification of wind in Lori, Gegharkunik, Aragatsotn foothills and Ararat. Wind speed ran up to 15 m/sec., flaws - 18-22 m/sec.

On some days there was a fog in Ararat valley and Syunik.

The temperature reduction was observed in the second decade of December.

For most of the rivers of the republic the average monthly river flows comprised approximately 80-100% of their norms.

5. SOCIO-DEMOGRAPHIC INDICATORS

The level of Sevan lake was reduced by 4 centimetres during the month and as of the 31st December 2003 comprised 1897.24 m, which, in comparison with the same day of 2002, was above by 48 centimetres.

5.11. Monitoring of Environment Pollution

According to the information of the RA Ministry of Nature Protection, the environment of the republic in 2003 had the following characteristic:

Monitoring of air basin quality. For 2003 air basin observations were implemented in Alaverdi, Ararat, Gyumri, Yerevan, Hrazdan and Vanadzor towns of the republic.

21316 samples were taken through the 13 permanent observation posts.

- 9762 air samples were taken through the 5 permanent observation posts of Yerevan city. Average annual Maximum Allowable Concentration (MAC) of dust, sulphur dioxide and nitrogen dioxide from 5 determined substances were exceeded 4.0, 2.4 and 2.2 times correspondingly. Concentrations of the other determined substances were within the allowable norm.
- 3834 samples were taken through the 2 permanent observation posts in Alaverdi town, in which the concentrations of sulphur dioxide, carbon oxide and dioxide were determined. Average annual MAC of sulphur dioxide was exceeded by 3.4 times. The other determined substances were within the norm.
- 6757 air samples were taken through the 3 permanent observation posts in Vanadzor. The concentrations of dust, sulphur dioxide and carbon oxide were determined and were within the allowable norm.
- By 278-s samples for determination of the content of cement kiln dust were taken through by 1 permanent observation posts in Ararat and Hrazdan towns. Average annual MAC-s of cement kiln dust were exceeded 2.0 and 4.0 times correspondingly.
- Observations in Gyumri town have been stopped since August. According to the data for 7 months, in the 407 taken samples the average concentration of dust was above the norm 3.3 times.

Monitoring of surface water quality. Because of repair work of the central laboratory of Yerevan, samples were taken only for the IV quarter of 2003. 26 indicators were determined in the 34 taken samples.

In 2003, 21 samples were taken from Pambak and Debed rivers by the laboratory of Vanadzor town, and 21 indicators were determined.

1325 tests were carried out in all the 55 taken samples.

In the samples taken from Pambak and Debed rivers, MAC of nitrate ion and ammonium ion were exceeded 1.1-2.2 times. The other determined indicators were within the norm.

In the samples from Hrazdan, Sevjur, Qasakh, Getar, Marmarik rivers and Yerevan lake, MAC of ammonium, nitrite, copper, sulphate and magnesium ions, biochemical oxygen demand (BOD₅) and mineral oil were exceeded.

MAC of ammonium ions in Yerevan lake was exceeded 1.9-4.7 times, in the section near Hrazdan river mouth - 4.4-10.4 times. In the IV quarter, in Hrazdan river, in the section near Darbnik village a high pollution with ammonium ions were observed, MAC was exceeded 12.6-19.7 times.

MAC of nitrite ions was exceeded in the Hrazdan river sections near river mouth and Darbnik village 4.6-8.0 times, in Getar - 6.6-10.0 times and in Yerevan lake - 2.8-6.6 times. In other samples the MAC of nitrite ions were exceeded 1.2-2.7 times.

5. SOCIO-DEMOGRAPHIC INDICATORS

MAC of BOD₅ was exceeded 1.4-4.0 times.

MAC of copper ion in all taken samples was exceeded 5.0-14.0 times (in Hrazdan river, in the section near Darbnik village - 17.7 times) and mineral oil - 1.6-3.2 times.

MAC of sulphate ions in the taken samples was exceeded 1.2-2.9 times, near Getar river mouth - 1.2-3.4 and in Sevjur river - 3.1-3.3 times, as a consequence, insignificant excess of the allowable norm of mineralization was also observed in Sevjur river.

There were also cases of exceeding of magnesium ion MAC 1.1-2.2 times.

5.12. Emergency Situations

According to the summary information of the Department of Emergency Situations under RA Government for 2003, 2389 cases of emergency situation were registered within the territory of the republic. 1973 persons suffered from catastrophes, 282 persons of which died, 1631 – injured, 60 – temporarily resettled.

17.2% of the registered emergency situations were natural calamities, as a result of which 119 persons were suffered, 2 persons of which died, 57 – injured, 60 - temporarily resettled. Damage caused by natural calamities amounted 49.2 mln. drams.

Number of Natural Calamities and Suffered Persons

	Number of registered cases, total	Caused damage, ths. drams	Number of suffered persons, persons of which			
			total	died	injured	temporarily resettled
Natural calamities, total	412	49160	119	2	57	60

In 2003, 1504 managers and specialists of the system on population protection in emergency situations were trained for implementation of work on elimination of emergency situations.

5.13. Exploration Work

According to the summary data of the RA Ministry of Nature Protection for 2003, the total volume of exploration work implemented in the republic comprised 109.5 mln. drams (124.1 mln. Drams for 2002), 22.7% of which were assigned from the RA State Budget. In 2003, 1120.7 m. mechanical drilling were implemented, 400.7 m of which – core drilling, 720.0 m – non-core drilling. These works were carried out completely at the expenses of the off-budget funds.

The volume of mining land excavations comprised 930.0 cubic metres (brook, trench, stripping, etc). Square of prospect-holes of mining land excavations dug at a depth up to 5 metres comprised 40.0 sq. metres. Square of geological extraction comprised 1404.0 sq. km. These works were carried out completely at the expenses of the RA State Budget.

5. SOCIO-DEMOGRAPHIC INDICATORS

The volume of regional exploration work comprised 20.0 mln. drams, 72.6% of which - geological, 27.4% - hydrogeological and engineering-geological. 72.2% of these work were carried out at the expenses of the RA State Budget and 27.8% - at the expenses of the off-budget funds.

The field work (cartography on the spot, design, etc.) on 2.4 mln. drams and laboratory work – on 3.3 mln. drams, transport charges (transportation of staff and cargo) on 1.7 mln. drams and other work on 1.9 mln. drams were carried out.

During 2003 the drilling work for 27 boring-wells (in 2002 – 18) were finished (finally drilled), 16 of which – below 25 m., 11 – at a depth from 25-100 m. The total depth of finished boring-wells comprised 1120.7 m (in 2002 - 1042 m), and average depth - 41.5 m (in 2002 - 57.9 m).

Volume of Exploration Work by the Quarters of 2003

	I		II		III		IV	
	2002	2003	2002	2003	2002	2003	2002	2003
Total, mln. drams	22.6	0.8	28.1	19.7	17.1	20.7	56.3	68.3
of which VAT	3.8	0.1	3.6	0.2	2.0	2.8	7.8	9.1
including								
at the expenses of state budget, total	-	-	-	-	-	-	28.3	24.9
of which VAT	-	-	-	-	-	-	4.3	2.2
by off-budget agreements, total	22.6	0.8	28.1	19.7	17.1	20.7	28.0	43.4
of which VAT	3.8	0.1	3.6	2.5	2.0	2.8	3.5	6.9

Exploration Work by Spheres and Work Stages
