

5. DATA COLLECTION

The whole process of necessary information collection from the organizations, as well as observation of motor vehicles set out on route was implemented by interviewers through the inquires.

Before that, with the purpose to prepare and conduct the survey, the instructing of interviewers has been implemented, the necessary questionnaire for the observation, instructions on completion, as well as list of relevant organizations and routes have been given to them.

During the instructing, explanations on completion of indicators included in the questionnaire, as well as peculiarities of questionnaire completion were given to interviewers. Detailed explanations on peculiarities of questionnaire completion in case of refusing organizations to take part in completion of questionnaires and etc. were given as well.

With the purpose to ensure the possible high quality of the received information, as well as to reduce the cases of non-response, incomplete responses and/or other cases, the National Statistical Service of RA has also implemented a series of measures to clarify the necessity and objectives of the survey, in the respect of questionnaires completion, to increase the interest of organizations covered by the survey and to render them practical support.

The data collection was implemented by the marzes of the republic. Questionnaires completed by interviewers after the logical and arithmetical cheking by regional agencies of the NSS RA were submitted to the NSS RA, where the input of checked and coded questionnaires was implemented (based on the relevant software).
