

5. 2011 RA POPULATION CENSUS PREPARATORY PHASE

5.1 MAPPING

Preparation operations of schematic layouts (**6 paper copy and electronic version**) were realized for planning Population Census processes and controlling operations (total 97 units) for 48 urban and 37 big rural communities (5,000 and more population) as well as for 12 administrative districts of Yerevan city.

Schematic layouts electronic versions and one paper copies were sent to the NSS RA marz agencies for checking together with corresponding specialists of local authorities and for **approving by authorized person of marzpetaran** and if necessary for adjustment. Adjustments of schematic layouts were transferred to the other copies. While preparing schematic layouts it was important the availability of necessary data for Population Census organization.

As of 15 August, 2011 schematic layouts reception from 85 communities of RA and 12 administrative districts of Yerevan city was completed.

The result of these operations was that borders of towns were adjusted as well as names of streets and numbering of blocks and houses were regulated as far as possible.

The territory was delimited on one copy of schematic layout of each town (big village) according to listing areas and were distributed among registrars, other copies were distributed according to enumeration, supervisory and census areas.
