*Note: All absolute indicators are shown at current prices.*

<sup>◇</sup>The data are verified.

<sup>1</sup> These (program) revisions of the Indicator of economic activity estimates are conditioned by the annual GDP revision schedule, according to which the weights of the types of economic activity in the annual GDP (excluding net taxes and FISIM) have changed in 2019 GDP by reported data, based on that, in 2020 GDP by revised data.

<sup>2</sup> The publication of the estimate of the average monthly nominal wages/salaries of the reference month is being interrupted due to the fact that from April 2020 the **estimated indicator based on the analysis of time series**, was significantly different from the indicators calculated on the basis of the database of the Income Tax and Social Payment submitted by the State Revenue Committee. Thus, the indicator will be calculated and published **exclusively** on the basis of the database received from the State Revenue Committee (25th / 26th day after the reporting month) and will be posted in this table on the **last working day of the month**.

<sup>3</sup> The indicators of March, were posted on April 30.
